Check out our Website!

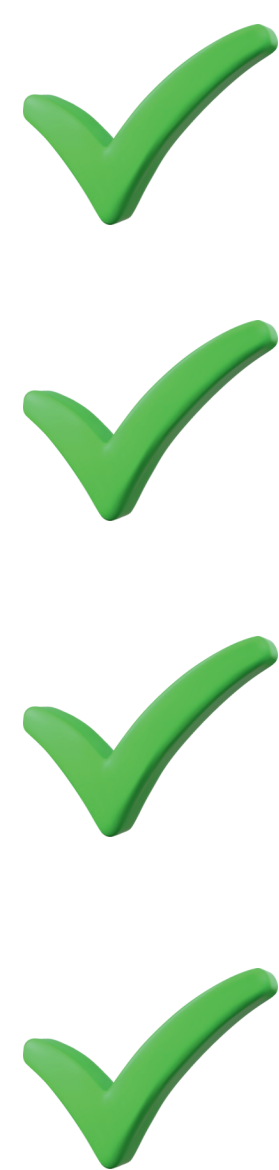

1. Problem

1. Increasing Importance of Air Quality Monitoring
2. Lack of Monitoring Devices for AC Units
3. No User-Friendly and Cost-Effective solutions

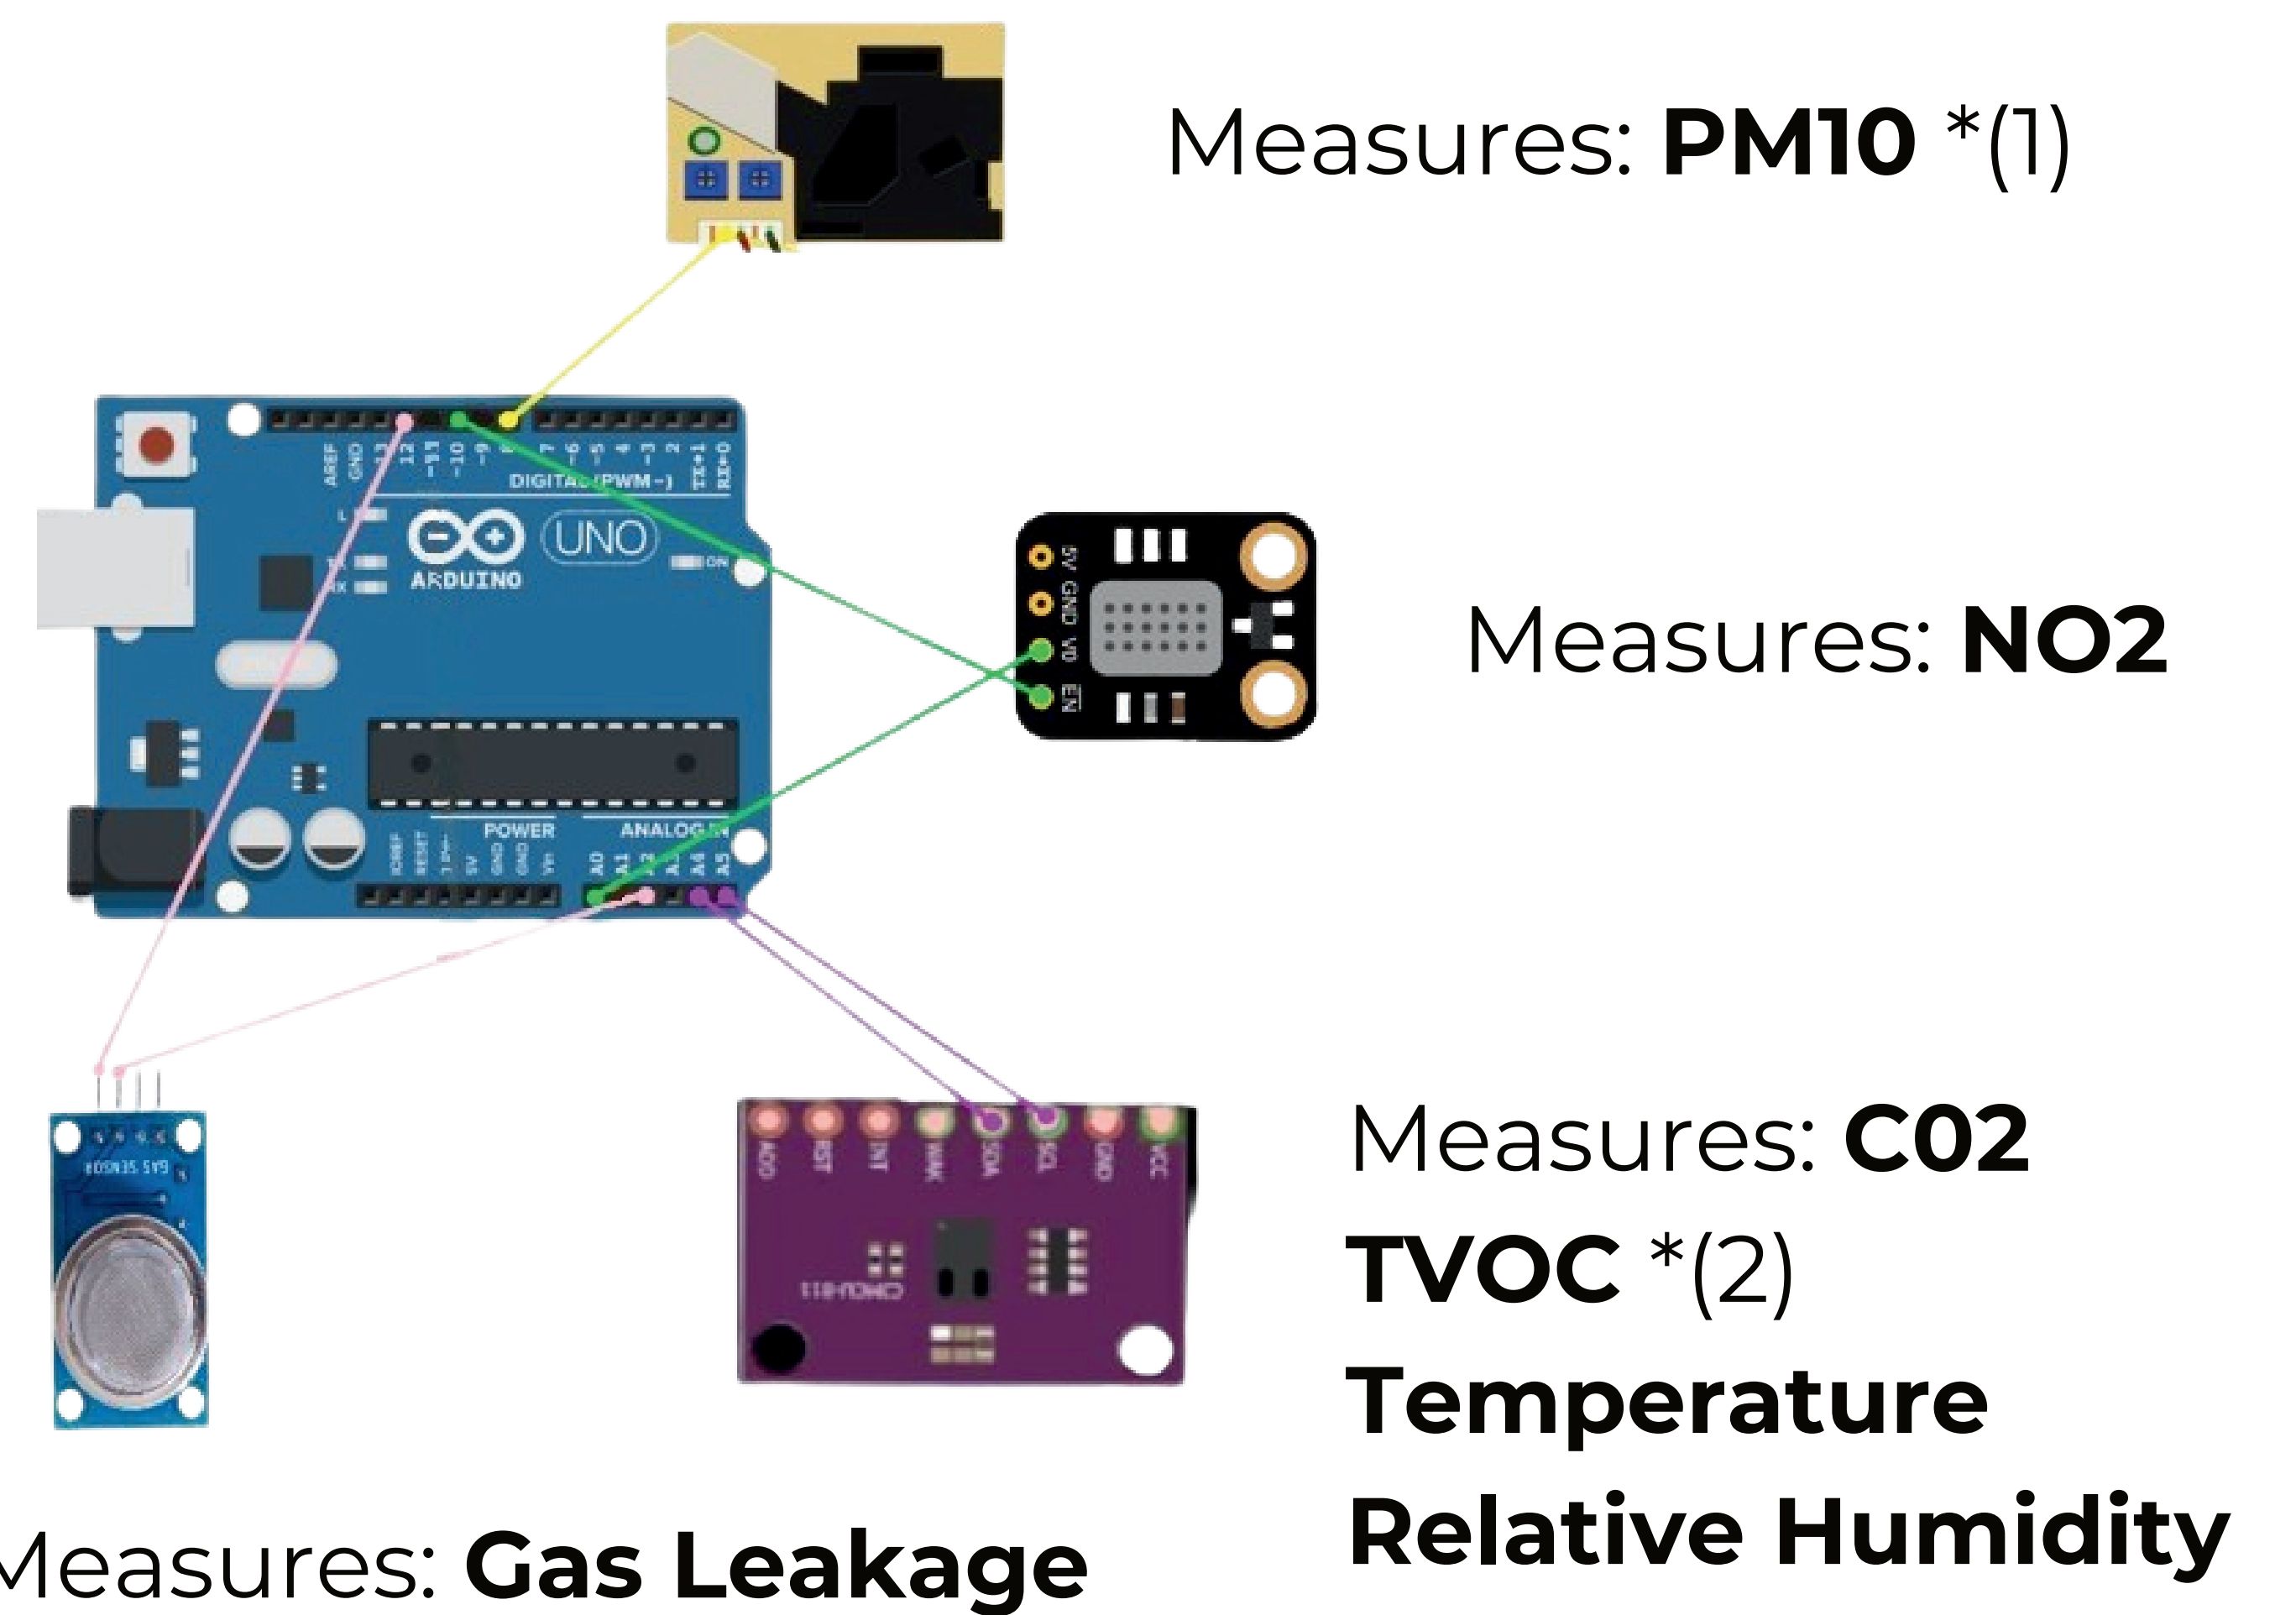

2. Solution

- Cost - Effective
- Intuitive, User Friendly Interface
- Real Time Measurement of key Air Quality Parameters
- No need for Third Party Maintenance

3. Product

^{*(1)} PM10 - Particulate Matter Smaller than 10 Micrometers

^{*(2)} TVOC - Total Volatile Organic Compounds

The 5 possibilities of the result of the calculation of the Air Quality Index can be:

1 - Very poor
2 - Poor
3 - Moderately polluted
4 - Satisfactory
5 - Good

4. Results

All the results and specifications are shown online! You can check them on our website!
