

# DEMS

YOUR LIFE, OUR PRIORITY

## Dynamic Emergency Monitoring System

Find us here

TÉCNICO  
LISBOA

### 1. PROBLEM

Manual triage systems are outdated and static.

Critical patients can deteriorate unnoticed.

Healthcare staff are overwhelmed and resources misallocated.

### 2. SOLUTION

Real-time patient monitoring with wearables for faster, smarter emergency care.

Registration & Triage

Patient with wearable

Server/Data processing

Data Access (Dashboard)

Medical Decision

### 3. HOW IT WORKS

1 Patients receive smart bracelet

2 Vitals data (Heart Rate, SpO2, Temperature)

3 Information is sent via Wi-Fi to the server

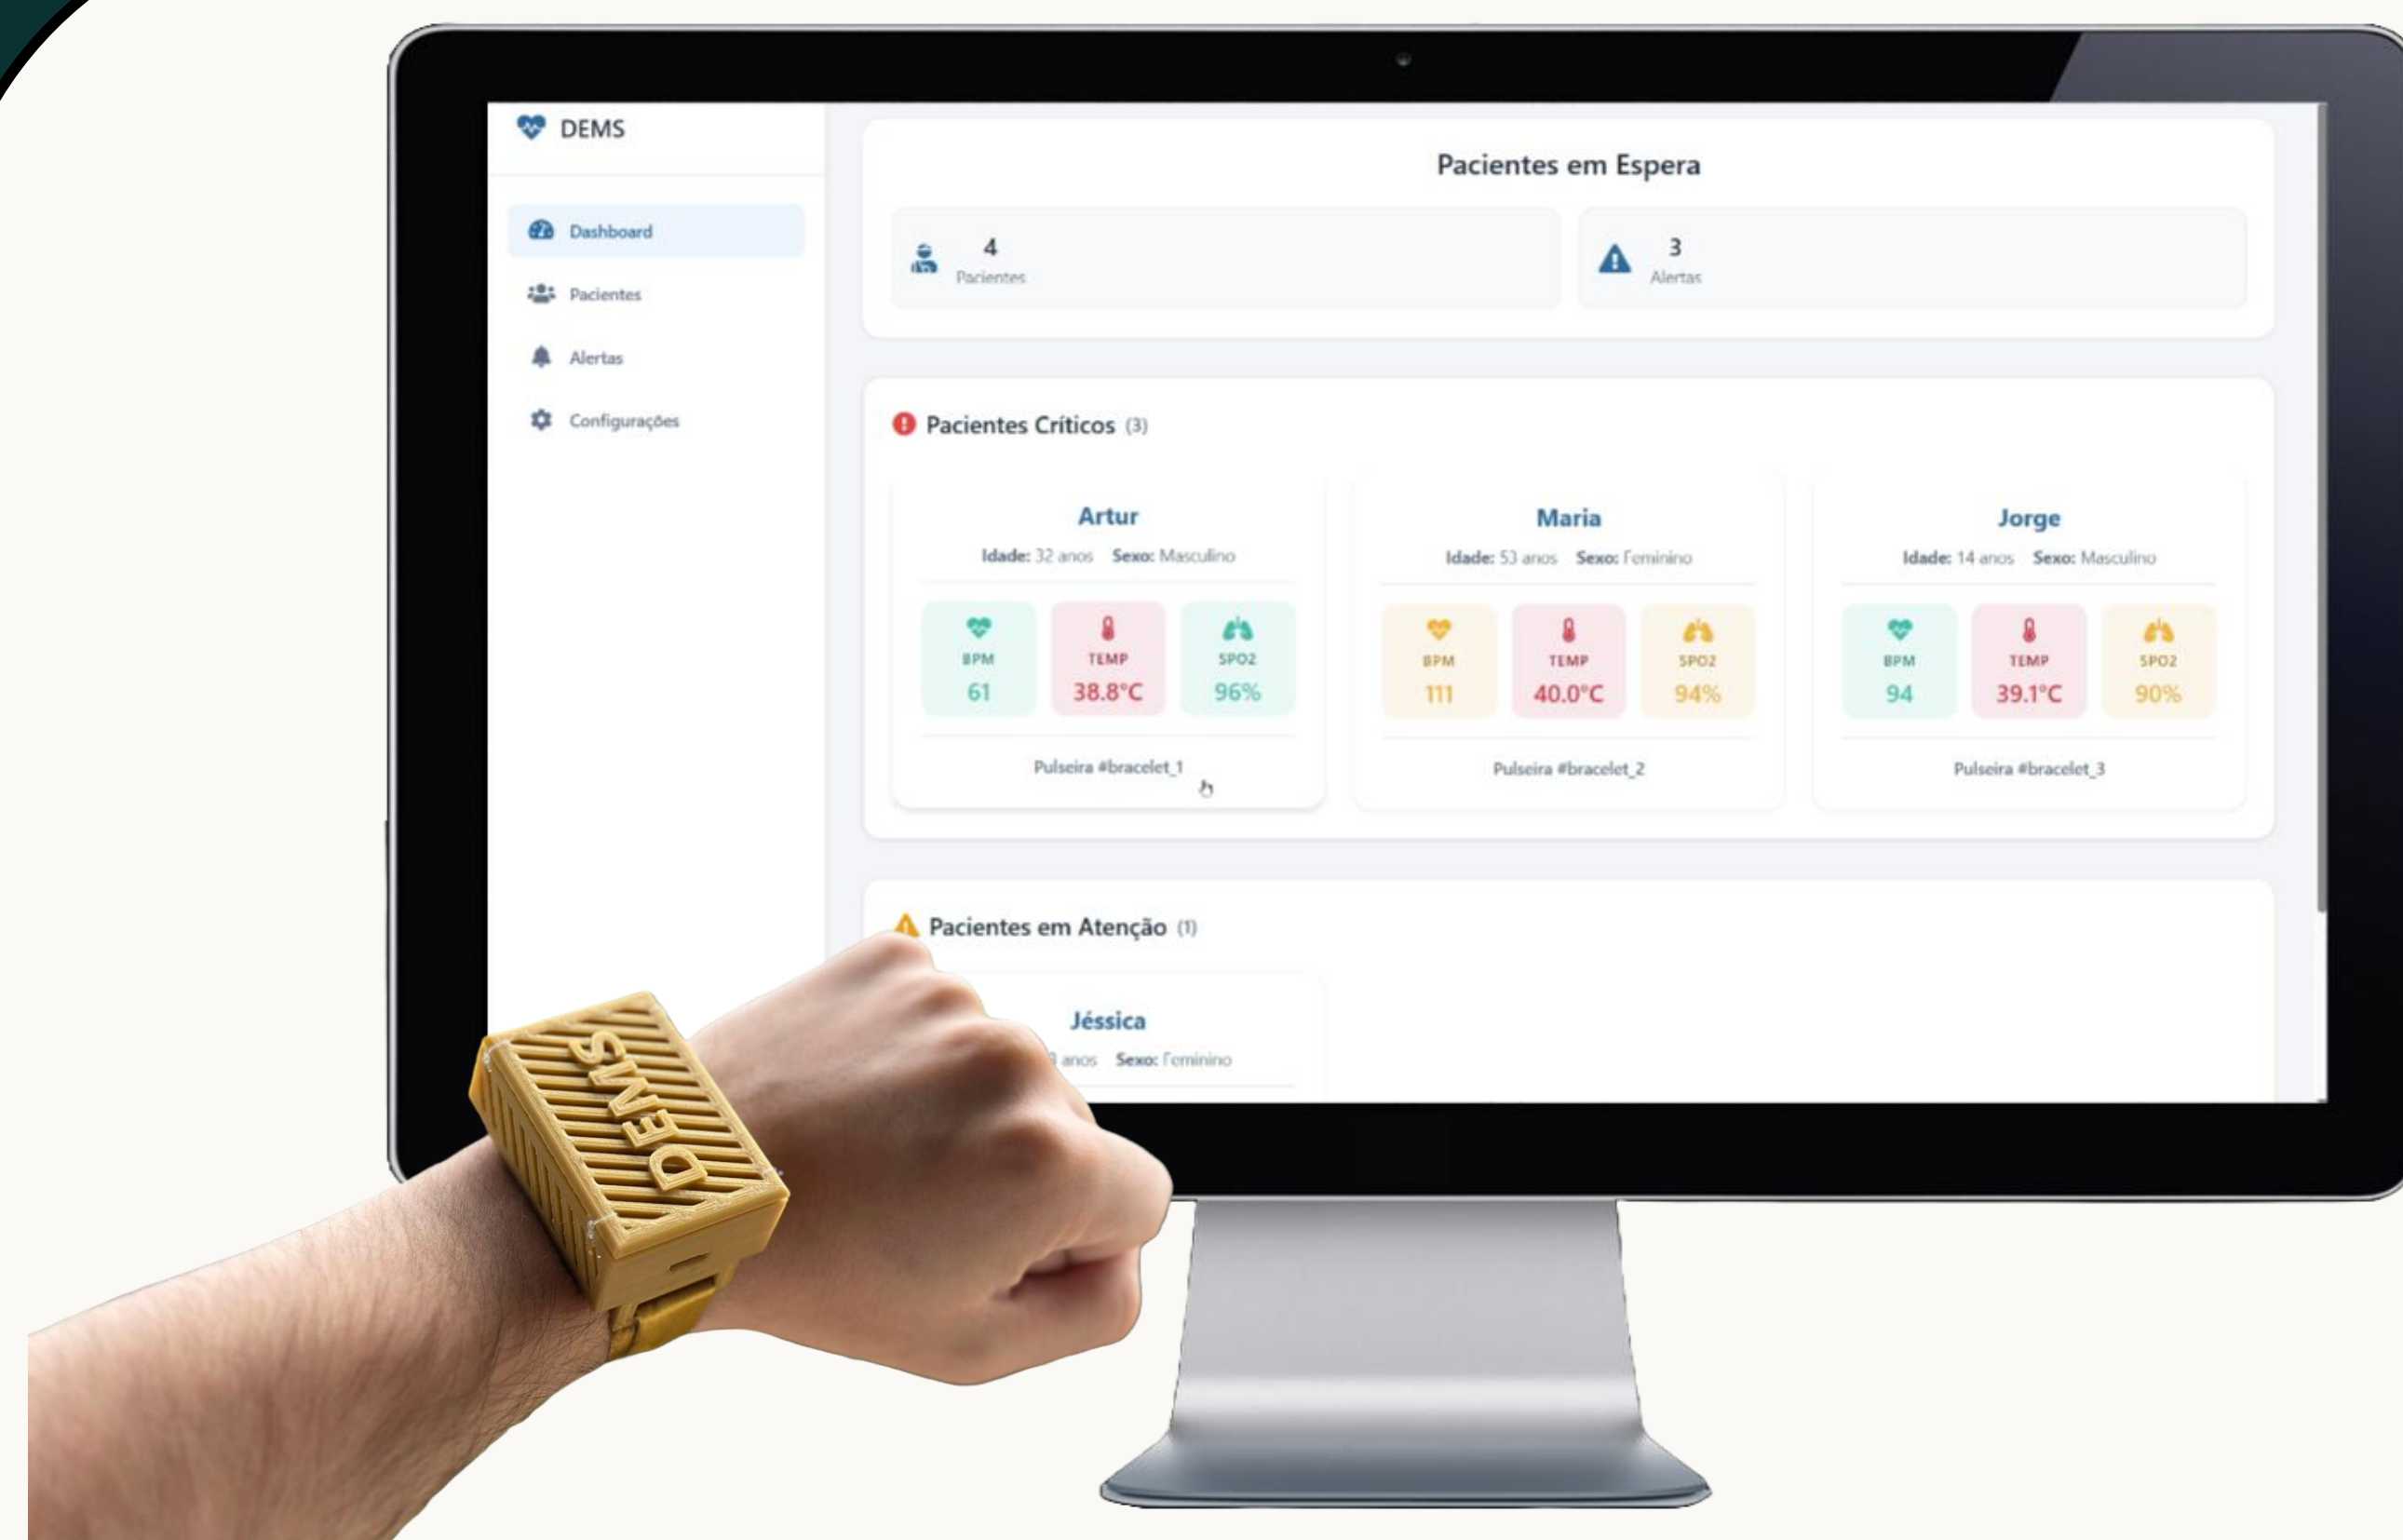

4 Clinical dashboard displays real-time alerts

5 Doctors make immediate decisions

### 7. RESULTS

The prototype was successfully tested, proving its functionality and effectiveness in real-world conditions.

Because your life is more than a moment — it's everything.

### 6. BENEFITS

Immediate Response to Critical Alerts

Continuous Monitoring of Vital Signs

Patients Fall Detection

### 4. TECHNOLOGY

Microcontroller (ESP32-C3)

Temperature Sensor (MLX90614)

Oximeter (MAX30102)

Accelerometer (MMA8452Q)

Wi-Fi

Database Management (Laptop)

### 5. FEATURES

Hearth Rate

Falls detector

SPO2

Temperature
